

ANUJ VISHWAKARMA

Kanpur, Uttar Pradesh | +91 6386109984 | anujvishwakarma7077@gmail.com | LinkedIn | GitHub

Professional Summary

Software Engineer and 2026 CSE graduate with strong fundamentals in **Data Structures, Algorithms, and System Design**. Proficient in building scalable **Node.js** and **Java** backend **RESTful microservices**, and optimizing **PostgreSQL** and **MongoDB** database performance. Skilled in orchestrating **CI/CD pipelines (AWS EC2, Docker)**, **unit testing**, and developing secure, production-ready systems.

Education

Kanpur Institute of Technology
B.Tech in Computer Science & Engineering (AI & ML) – CGPA: 7.44

Kanpur, UP
2022 – 2026

Skills Summary

Languages: JavaScript (ES6+), Java, SQL, HTML5, CSS3
Backend & Design: Node.js, Express.js, RESTful Microservices, System Design, Clean Code
Databases: PostgreSQL, MongoDB, Mongoose, MongoDB Atlas, MySQL
Frontend & Tools: React.js, Tailwind CSS, Bootstrap, Postman
Cloud & DevOps: AWS (EC2, S3), Docker, GitHub Actions (CI/CD), PM2, Git
Security & CS: JWT, OAuth 2.0, RBAC, Unit Testing, Debugging, DSA, OOP

Experience

Optiflow Technologies
Full Stack Developer Intern

Kanpur, UP
Mar 2026 – May 2026

- Engineered high-performance **Node.js/Express RESTful microservices** featuring **JWT dual-role authentication** and **RBAC** to enforce strict, enterprise-grade system access control.
- Architected database schemas using **PostgreSQL** and **MongoDB**, optimizing indexing strategies to achieve **sub-second, low-latency** query performance across datasets.
- Participated in peer **code reviews** and SDLC workflows, delivering responsive **React.js** web interfaces aligned with **clean code architecture** and automated testing practices.

Infosys Springboard 6.0
AI/ML Intern

Remote
Dec 2025 – Feb 2026

- Architected an **intelligent AI contract auditor** using **Node.js, Express**, and **Gemini 2.5 Flash** LLM APIs, parsing financial documentation with **95%+** parsing accuracy.
- Built **telemetry middleware** for real-time traffic logging and latency tracking, executing rigorous **unit testing** and debugging to minimize **API response overhead**.
- Integrated multi-source external APIs (**NHTSA, RapidAPI**) into a unified microservices pipeline, implementing robust **payload validation** and error handling routines.

KaryaNexus Solutions
Frontend Developer Intern

Kanpur, UP
Jul 2025 – Mar 2026

- Developed **mobile-first, modular UI components** using **React.js** and **Tailwind CSS** across **2+ production client applications**, enhancing responsive design consistency.
- Implemented backend contact forms with **SMTP email delivery** and payload validation pipelines, maintaining high code quality and **test coverage** across modules.
- Collaborated with cross-functional engineering teams in **Git feature-branch workflows** to translate technical specifications into **production-ready code**.

Projects

Automated AI Auto Contract Auditor & CI/CD Pipeline | *React, Node.js, Express, Gemini API, AWS EC2, PM2* (GitHub)

- Engineered an end-to-end auto contract auditing platform using **React, Node.js**, and **Gemini 2.5 Flash** APIs to parse PDF worksheets with **95%+** data extraction precision.
- Built **RESTful microservices** with **JWT authentication**, **Razorpay API** credit controls, and **NHTSA APIs** for 17-digit VIN decoding and safety recall lookups.
- Configured continuous deployment (**CI/CD**) to **AWS EC2** via **GitHub Actions** using self-hosted runners and **PM2** for zero-downtime updates triggered on main pushes.

Full-Stack Asset Management & Cloud Platform | *Node.js, Express, MongoDB Atlas, Cloudinary, Mapbox* (GitHub)

- Architected a scalable web platform using **Node.js, Express**, and **MongoDB Atlas** following MVC architecture with schema validation (**Joi**) and RESTful APIs.
- Configured dual authentication using **Passport.js** with **Google OAuth 2.0** and session management, enforcing granular **role-based authorization (RBAC)** across endpoints.
- Integrated **Cloudinary** for cloud image management and **Mapbox APIs** for interactive geospatial mapping, deployed live on **Vercel** with sub-second query latency.

Honors and Achievements

- Research Paper Competition:** Secured **2nd Place** at University Research Paper Competition, KIT (2025).
- Algorithmic Optimization:** Mastered **300+ Data Structures & Algorithms** challenges across **LeetCode** and **GFG**, applying optimal time and space complexities.
