Employability Enhancement Programme

Centum Foundation, supported by

Infosys Foundation | Aug 2025

SUMMARY

MERN Stack Developer and 2026 CSE graduate with hands-on internship experience building REST APIs, authentication systems and responsive web applications using JavaScript, React.js, Node.js, Express.js and MongoDB. Comfortable working across the full stack and delivering production-ready solutions independently.

EXPERIENCE

OPTIFLOW TECHNOLOGIES | FULL STACK DEVELOPER INTERN

Mar 2026 – May 2026 | Gopal Nagar, Kanpur (On-site)

- Built 15+ REST APIs using PHP Laravel for dual user role authentication — covering login, signup, forgot password, reset and change password flows for clients and customers.
- Developed a CMS admin panel managing 10+ content sections with role-based access control (RBAC), activity tracking and blog integration.
- Delivered fully responsive UIs for 3+ client websites ensuring consistent cross-device compatibility across all screen sizes and browsers.

KARYANEXUS SOLUTIONS | FRONTEND DEVELOPER INTERN

Jul 2025 – Mar 2026 | Raniya, Kanpur (Hybrid)

- Built 20+ mobile-first UI components using React.js and Tailwind CSS across 3+ client projects, focusing on component architecture and code reusability.
- Developed a contact form with backend email integration, enabling automated lead capture to client inboxes with real-time delivery.
- Converted design mockups into production-ready frontend code for 5+ pages, ensuring pixel-perfect accuracy and on-time delivery.

PROJECTS

HAVYNLIFE | NODE.JS • EXPRESS • MONGODB • EJS [GITHUB] [LIVE]

- Developed a Full-Stack Web Application inspired by Airbnb, implementing 10+ REST API endpoints with complete CRUD Operations for listings and reviews, enforcing ownership-based Authorization via middleware.
- Implemented dual-strategy Authentication using Passport.js (Google OAuth 2.0 and local strategies) with secure Session Management via Express Sessions.
- Integrated Cloudinary for image uploads (up to 5 per listing), Mapbox for geolocation mapping and MongoDB Atlas for cloud database management.

TANVIQGPT | REACT.JS • NODE.JS • EXPRESS.JS • MONGODB ATLAS •

OPENROUTER API

[GITHUB] [LIVE]

- Built a Full-Stack AI Application with AI/LLM API integration via OpenRouter API, delivering real-time conversational AI responses in a modern dark-mode UI.
- Designed a thread-based conversation schema in MongoDB with unique thread IDs, maintaining complete message history for multiple concurrent users with user and assistant roles.
- Developed 8+ REST APIs using Node.js and Express.js for CRUD operations on chat threads; deployed backend on Render and frontend on Vercel.

ACHIEVEMENTS

2025 Secured 2nd Place in University Research Paper Competition, Kanpur Institute of Technology
